Subject: Red Hat RHEL 3.0 EOL

Dear Magma Customer:

Red Hat periodically releases new versions of Linux OS allowing Magma and its customers to take advantage of new capabilities provided by OS suppliers. As a result, Magma has added support for Red Hat RHEL 5.0 OS on the X86\_64 hardware platform for Talus 1.0. Release 1.0.78 is the first release available on RHEL5.

As a result of adding this new version, we will be ending support for Red Hat RHEL 3.0 OS on the X86 and X86\_64 platforms on June 30, 2008. The only product affected is Talus 1.0. Release 1.0.82 will be the last release to support RHEL 3.0.

If you are currently using RHEL 3.0, Magma encourages you to move to RHEL 4.0 or RHEL 5.0 as soon as possible. Talus 1.0 will continue to be supported on these two releases. If you have any questions or require assistance in the migration, please contact your Magma account manager.

Sincerely,

A handwritten signature in black ink that reads "Jayant Shah". The signature is written in a cursive, flowing style.

Jayant Shah
